CLAIMS

بر	w	a^2	> \
~	• •	3	(1. A hardware upgrade for a terminal for use with a television program delivery system,
		14	the hardware upgrade comprising:
		5	an interface to the terminal; and
		6'	a modern connected to the interface.
		7	
		8	2. The hardware upgrade of claim 1 further comprising a microprocessor connected
		9	between the interface and the modem.
	, mare	10	
	ű	11	3. The hardware upgrade of claim 2 further comprising memory connected to the
	W	12	microprocessor.
	T	13	
	Ţ	14	4. The hardware upgrade of claim 1 wherein the modem is capable of communicating
	¥	15	with an interactive service.
		16	
	H	17	5. The hardware upgrade of claim 4 wherein the interactive service is outside of the
	u 1	18	television program delivery system.
	Ф	19	
		20	6. The hardware upgrade of claim 4 wherein the interactive service is selected from a
		21	group consisting of home shopping, airline reservations, news, financial information,
		22	classified advertisements, home banking, and interactive teletext.
		23	
		24	7. The hardware upgrade of claim 1 wherein the modem is capable of communicating
		25	with an on-line database.
		26	
		27	8. The hardware upgrade of claim 7 wherein the on-line database is outside of the
		28	television program delivery system.
		29	

Docket 5815VPTO Filings\Application

Ų

- The hardware upgrade of claim 7 wherein the on-line database contains data 9.
- concerning one dr more applications selected from a group consisting of home shopping, 2
- airline reservations, news, financial information, classified advertisements, home banking, 3
- and interactive telefext.
- **10**. The hardware upgrade of claim 1 wherein the interface to the terminal comprises a
- four-wire connector.
- The hardware upgrade of claim 1 wherein the interface to the terminal comprises a 11. multipin connector.
 - The hardware upgrade of claim 11 wherein the multipin connector is a multipin **12**. connector ranging from type DB9 to type DB25.
- The hardware upgrade of daim 1 wherein the interface to the terminal comprises a **13**.
- SCSI connector.
 - A terminal for use with a television program delivery system, the terminal comprising: a receiver adapted to receive programs; and a first hardware upgrade comprising:
 - an interface to the terminal; and
- a modem connected to the interface.

- **15**. The terminal of claim 14 further comprising a display that indicates when the 24
- hardware upgrade is in use. 25

26

- 16. The terminal of claim 14 wherein the terminal has an expansion card slot, and wherein 27
- the interface comprises at least one card connector adapted for use with the expansion card 28
- slot_ 29

Docket 5815VPTO Filings\Application

17.

2

3	18 .	The terminal of claim 14 wherein the terminal is an HDTV terminal.
4		\
5	19 .	The terminal of claim 14 further comprising:
6		one or more additional hardware upgrades connected to the terminal.
7		
8	20.	The terminal of claim 19 wherein the first hardware upgrade and the one or more
9	additi	ional hardware upgrades are connected in a daisy-chain arrangement.
10		
11	21.	The terminal of claim 20 wherein each of the first hardware upgrade and the one or
12	more	additional hardware upgrades comprises a SCSI connector, and the daisy-chain
13	arran	gement is a SCSI daisy-chain arrangement.
14		
15	22 .	The terminal of claim 19 wherein the first hardware upgrade and the one or more
16	additi	ional hardware upgrades are capable of operating simultaneously.
17		
18	23 .	The terminal of claim 19 wherein at least one of the one or more additional hardware
19	upgra	ides is selected from the group consisting of an audio program reception hardware
20	upgra	ade, an interactive hardware upgrade that receives interactive subscriber input and

produces interactive output, and a storage hardware upgrade.

The terminal of claim 14 wherein the terminal is a set top terminal.

21

22

A system comprising:

a television program delivery system adapted to deliver television program signals;

25 and

a terminal comprising:

a receiver adapted to receive at least some of the television program signals;

and

29 a hardware upgrade comprising:

Docket 5815/PTO Filings/Application

			\
	1 .		an interface to the terminal; and
	2		a modem connected to the interface.
	3	,	,
	4	25 .	The system of claim 24 wherein the television program delivery system is a cable
	5	televis	sion program delivery system.
	6		
	7	26 .	The system of claim 25 wherein the cable television program delivery system
	8	compr	rises an operations center, the operations center transmitting one or more of the
	9	progra	ims to the terminal.
F.	10		
W.	17	27 .	The system of claim 26 wherein the cable television program delivery system further
KU)	12	compr	ises one or more headends, a particular one of the one or more headends transmitting
۵ ۲	13	one or	more of the programs to the terminal.
7	14		
W s	15	28.	The system of claim 24 wherein the television program delivery system is a satellite
jateg nggg	16	broado	cast system.
	17		
· VI	18	29 .	The system of claim 24 wherein the terminal is an HDTV terminal.
Ē	195	>	
•	201	30 .	A television terminal comprising:
	X24/		a elevision program receiver;
2	\mathcal{I}_{22}		a modem; and
	23		an output connected to the receiver and the modem, wherein the output accepts
	24	televis	sion program signals from the receiver and data signals from the modem.
	25		
	26	31.	The television terminal of claim 30 wherein the output is a video display.
	27	25	
	28	32 .	The television terminal of claim 30 wherein the output is a connector port.
	29		

- 1 33. The television terminal of claim 30 further comprising a microprocessor connected to
- 2 the modem.

3

- 4 34. The television terminal of claim 33 further comprising memory connected to the
- 5 microprocessor.

6

- 7 35. The television terminal of claim 30 wherein the modem is capable of communicating
- 8 with an interactive service.

9

10 **36**. The television terminal of claim **35** wherein the interactive service is outside of the television program delivery system.

12

The television terminal of claim 35 wherein the interactive service is selected from a group consisting of home shopping, airline reservations, news, financial information, classified advertisements, home banking, and interactive teletext.

16

17 38. The television terminal of claim 30 wherein the modem is capable of communicating with an on-line database.

19

The television terminal of claim \(\frac{38}{8} \) wherein the on-line database is outside of the television program delivery system.

22

- 23 40. The television terminal of claim 38 wherein the on-line database contains data
- concerning one or more applications selected from a group consisting of home shopping,
- 25 airline reservations, news, financial information, classified advertisements, home banking,
- 26 and interactive teletext.

27

- 28 41. The television terminal of claim 30 wherein the television terminal is an HDTV
- 29 terminal

5	

42. A method comprising:

receiving a television program;

recelving subscriber input;

communicating through a modem, comprising:

transmitting data based on the subscriber input; and

receiving data; and

displaying the television program and/or information based on the received data.

8

6

7

9 43. The method of claim 42 wherein the received data comprises information concerning the television program.

11 12

13

44. The method of claim 43 wherein the information concerning programs is selected from a group consisting of quizzes, facts, geographical information, and product information.

14 15

45. The method of claim 42 wherein the communicating step further comprises: communicating with at least one interactive service.

17 18

16

46. The method of claim 45 wherein the interactive service is outside of the television program delivery system.

20

19

The method of claim 45 wherein the interactive service is selected from a group consisting of home shopping, airline reservations, news, financial information, classified advertisements, home banking, and interactive teletext.

24

The method of claim 42 wherein the communicating step further comprises: communicating with at least one on-line database.

2728

29

49. The method of claim 48 wherein the on-line database is outside of the television program delivery system.

4

7

9

11

13

16

20

25

29

- The method of claim 48 wherein the on-line database contains data related to one or more applications selected from a group consisting of home shopping, airline reservations, news, financial information, classified advertisements, home banking, and interactive teletext.
- 5 51. The method of claim 52 further comprising: 6 storing digital data on a storage device.
- 8 52. The method of claim 51 wherein the storage device is a disc.
- 10 53. The method of claim 52 wherein the disc is a CD.
- 12 54. The method of claim 53 wherein the CD is a CD-ROM.
- The method of claim 51 further comprising:
 processing the digital data stored on the storage device.
- The method of claim 51 wherein the stored digital data concerns one or more applications selected from a group consisting of games, education, encyclopedias, reference, and economics.
- The method of claim 51 wherein the received data comprises information concerning the television program, and the method further comprises:
- 23 monitoring the information concerning programs; and 24 retrieving the stored digital data, in response to the monitoring step.
- 58. The method of claim 42 further comprising:
 remotely receiving the interactive subscriber input.

- 1 59. The method of claim 42 further comprising:
- generating a menu on a television, wherein the subscriber input comprises menu
- 3 selections
